

Welcome to Swift Biometrics

Swift Biometrics is a global supplier and integrator of high-quality core biometric and imaging technologies for human identification (ID) systems. The company focuses primarily on the delivery of rapid identification technologies suitable for integration into any application where identification speed and accuracy are the most critical factors. Swift's primary offerings are Swift IRIS, a patent pending iris recognition system, Swift EDoF, a patented Iris Imaging technology offering extended depth of field iris imaging, and high speed fingerprint recognition systems including IDKit, ExpressID AFIS and ANSI & ISO SDK's for standard and embedded platforms.

In addition to the product offerings, Swift offers highly specialized consulting services to biometrics technology companies that need help with independent technology evaluations, government certification, product development deployment strategies and even intellectual property development.

Swift's primary customers include other biometrics companies, systems integrators, military agencies, governments, law enforcement and corporations.

Our products and services include:

- Biometric SDK's for Iris and Fingerprint Recognition (Developer Kits)
- Biometric Sensors for Iris and Fingerprint Recognition (Various types)
- Software Licensing
- Custom Software Development
- Custom Hardware Development (Embedded Imaging Systems for Iris)
- Specialized Consulting Services
-

And More...

Our professional team is made up of industry veterans with many years experience. We welcome your questions and comments which may be submitted via our online contact form .
